Office Action Summary

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method for developing wheat gluten, classified in class 426, subclass 656.
 - II. Claim 12, drawn to a food product including developed wheat gluten, classified in class 426, subclass 3.
2. The inventions are distinct, each from the other because:
3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process, e.g. a process, which includes a step of mixing, developed wheat gluten with a foodstuff.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 09/612,238
Art Unit: 1761

6. A telephone call was made to Mr. Colton on May 3, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
